EXPERIENCE	Photon7 as a Visual Production Engineer	Jan 2024					
		Produced visual effects for Jungle Experience party in Ko Pha-ngan, Thailand.					
	Prepared, transported, and installed laser and video						
	Calibrated and VJed six lasers with Pangolin softwar	May 2020 – Nov 2022 ing and counter-abuse in Google re engineer candidates to join e languages. eers to align UI design along with					
	Google as a Software Engineer in Drive for iOS						
	Designed, developed, and deployed features for share Drive for iOS.						
	Conducted weekly interviews for prospective softwar Google.						
	Wrote code in Objective-C, Swift, and other in-house						
	Collaborated with the web and Android Drive engine specs provided by UX engineers.						
	Wrote design documents for upcoming features in G						
	Planned development in atomic tasks in weekly sprir	nts.					
	Apple as a Quality Engineer in Reality Kit	Apr 2019 – Mar 2020					
	Supported RealityKit with automated daily API testing	ng.					
	Conducted interviews for prospective QA engineers t						
	Developed a Swift application to run in a lab of vario						
	Designed and ran testing for SwiftStrike: an AR appl	ication shown at WWDC 2019.					
	Attended WWDC 2019 to provide technical supprort utilizing RealityKit.	vorks for RealityKit. ad cross-functionally with managers.					
	Specialized in animation and networking API framev						
	Colloborated with other QA engineers on my team ar software engineers, project managers, and technical						
	Provided status updates to my manager and team in on-one meetings.						
	Apple as a Quality Engineer in IMG Graphics & Imaging	Jul 2016 – Mar 2019					
	Developed a tool and network for storage and retriev testing.						
	Wrote tool with Python and network with PostgreSQ	nologies to parse image metadata.					
	Utilized ExifTool and in-house technologies to parse						
	Supported several QA teams by enhancing the tool to requirements.						
	Identified regressions through UI and API pre-submission and weekly testing.						
	Designed and ran feature testing for dark mode intro	oduced in macOS Mojave. nd cross-functionally with managers.					
	Colloborated with other QA engineers on my team ar software engineers, project managers, and technical						
	Provided written daily reports and met in-person we						
	Treasure as a Full Stack Developer	Oct 2015 – Jun 2016					
	Developed an ecommerce iOS app with Swift.	_					
	Developed a web crawler written in Ruby utilizing Rufrom various ecommerce website vendors.						
	Colloborated with two software engineers.						
	Worked part-time during school both in-person and	remotely.					
	Apple as a Quality Engineer Intern in IMG Graphics & Im						

	Automated video playback quality assur	rance by analyzing dropped frames with a			
	Wrote code in Python and Objective-C.				
	Deployed the tool in a lab of several dev	ices running macOS and iOS.			
	Presented the tool and testing results to a board of technical managers and Craig Federighi.				
	Salesforce (Tempo AI) as a Full Stack Engin	eer Feb 2014 – May 2015			
	_	Developed an Android application to support the pre-existing iOS application.			
	Wrote code in Java. Colloborated with eight software engineers. Worked part-time during school and full-time during summer break. Tempo AI was acquired by Salesforce in May 2015.				
	Tapestry Solutions as a Front End Engineer	Nov 2012 – Feb 2014			
	Developed desktop software for managing cargo shipments.				
	Utilized Adobe Flex front end and PostgreSQL databases.				
		200 Q2 databases,			
PROJECTS	Gin	Oct 2017			
	Created a cross-platform app to keep track of the score for two players in the card game Gin Rummy.				
	Wrote code in Swift.				
	Utilized SwiftUI.				
	Micronaut	Jan – Jun 2016			
	Created a platformer video game written in Swift for Apple TV.				
	Submitted to the Apple TV app store and was accepted within one week.				
	Manipulated sprites and parallax background images provided by a collaborating artist.				
	Wrote a dissertation analyzing the development process.				
	Submitted as my senior project for Cal Poly Computer Science bachelors degree.				
	Baaaaalrog	Jan 2016			
		op-down goat chucking video game.Created a			
	Wrote code in Java. Wrote code in Java.				
	Utilized libgdx.				
	Won first place for our location in the annual Global Game Jam hack-a-thon event.				
	Japanese Festival	Apr – Jun 2015			
	Created a real-time interactive 3D video game with an overworld and several minigames.				
	Wrote code in C++.				
	Utilized OpenGL.				
	Initialized source code versioning control for four developers with Git.				
	Submitted as my final project for Real-time 3D Graphics course at Cal Poly.				
	Deep Beat	Mar 2015			
	Created a rhythmic rail shooter game for				
	Wrote code in JavaScript.				
	Utilized CreateJS.				
	Utilized CreateJS.				

	Bunny Shrine			Jan – Mar 2015		
	Created an interactive 3D scene of the first-ever 3D scanned object.					
	Wrote code i	Wrote code in C++. Utilized OpenGL.				
	Utilized Ope					
	Submitted as my final project for Intro to 3D graphics course at Cal Poly.					
	Attack Vector			Jan 2015		
	Created an ir	Created an infinite maze runner game written in C++.				
	Utilized SFM					
	Participated	in the annual Global Game	Jam hack-a-thon ev	ent.		
	Stikit			Oct 2014		
	Created an A	Created an Android application.				
	Utilized Chro	omecast API and JSON data	transfer.			
	Participated	Participated in the annual Cal Hacks hack-a-thon event.				
EDUCATION	California Polytechnic San Luis Obispo Sep 2012 – Jun		Sep 2012 – Jun 2010			
	Graduated Computer Science BS with a GPA of 3.2.					
	Electives: Real-Time 3D Graphics, User Design, Security, HCI, OS, Networks, etc.
